Chart for ongoing monitoring during methylphenidate (MPH) treatment

As outlined in the prescribing information in more detail, growth, psychiatric and cardiovascular status should be regularly monitored:

- Blood pressure and pulse should be recorded at each adjustment of dose and then at least every 6 months
- Height, weight and appetite should be recorded at least 6-monthly with maintenance of a growth chart only applicable to children and adolescents below 18 years of age
- Development of de novo or worsening of pre-existing psychiatric disorders should be monitored at every adjustment of dose and then at least every 6 months and at every visit

| Date of initial assessment: | Patient name: | | | |
|-----------------------------|---------------|---------|--|--|
| Date of birth: | Age: | Gender: | | |

| | Baseline | Subsequent appointments | | | | | | | | | | |
|-----------------------|----------|-------------------------|--|--|--|--|--|--|--|--|--|--|
| Date of assessment | | | | | | | | | | | | |
| Reason for assessment | | | | | | | | | | | | |
| Blood pressure* | | | | | | | | | | | | |
| Heart rate* | | | | | | | | | | | | |
| Body weight (kg)** | | | | | | | | | | | | |
| Height (cm)** | | | | | | | | | | | | |
| Appetite** | | | | | | | | | | | | |
| | | | | | | | | | | | | |

*Blood pressure and heart rate should be recorded at each adjustment of dose and then at least every 6 months

**Height, weight and appetite should be recorded at least 6-monthly with maintenance of a growth chart and is only applicable to children and adolescents below 18 years of age
