

MaMVO

Nicholas Falzon – PRIMA President

PHARMACEUTICAL RESEARCH-BASED INDUSTRY MALTA ASSOCIATION

Composition of Malta NMVO (MaMVO)

3 organizations have so far signed up to be full members of the Maltese NMVO (MaMVO)

- PRIMA – Pharmaceutical Research Based Industry Malta Association
- GRTU – Malta Chamber of Small and Medium Enterprises
- Malta Chamber of Pharmacists

Composition of MaMVO

2 Associate members of MaMVO

- CPSU – Central Procurement and Supplies Unit as part of the Health Department
- Malta Qualified Persons Association

Status Update - MaMVO

The members of MaMVO have signed all the necessary paperwork and lawyers are registering the organization locally.

Once the organization is officially setup, the members will employ a project manager to push this project forward.

MaMVO will be responsible to choose a blueprint provider for the Maltese system.

Blueprint Provider

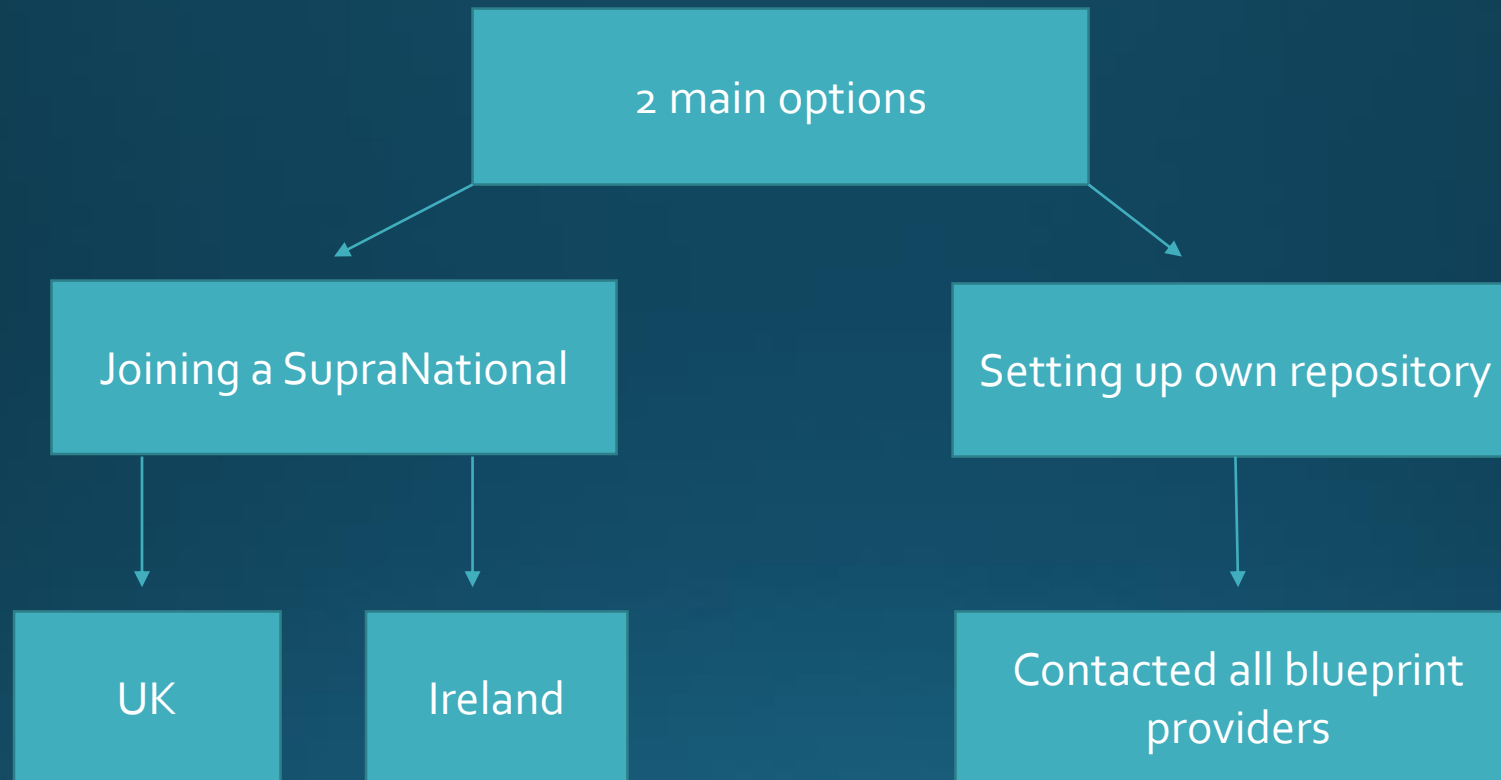

MaMVO has had several meetings with both Blueprint providers:

- Solidsoft
- Arvato

We have explored a number of options due to the complexity of the Maltese system.

Malta – Options

Difficulties with Malta

About 50% of products by volume are registered with article 126(A) –

All packs that are meant for a particular market would have its information uploaded into the national repository. On verification or check out, the system would retrieve the information for the particular pack from the repository.

Products registered with article 126A are usually products that weren't meant specifically for the Malta market so the corresponding info to verify these packs would not be available in the national repository. This would lead to an inter-market query.

Difficulties with Malta - 2

- Data - No IMS data which makes data collection and analysis very difficult.
- No economies of scale
- Complexity of provenance and multi-market nature of packs in Malta – imports from a variety of countries which have to be uploaded on the national repository. This could lead to a situation where one of the smallest countries would end up with one of the largest repositories.

MaMVO –Update

MaMVO has already started working on the next steps.

- Started meetings with blueprint providers.
- Compiled a job description for the employment of a Project Manager
- Data collection – we have contacted a number of associations and organizations so that we can start collating data which will be required by the blueprint providers.

Thanks
