

Malta, 17 August 2006
MA Circular No. P10/2006

Dear Healthcare Professional,

Re: Licensed therapeutic indications for Navidoxine 25mg tablets (Meclozine hydrochloride)

In line with the role of the Medicines Authority to contribute to the protection of public health in Malta, the Authority would like to bring to your attention the licensed therapeutic indications for Navidoxine 25mg tablets.

Meclozine is indicated for the prevention and symptomatic treatment of nausea, vomiting and dizziness associated with travel sickness.

For further prescribing information on Navidoxine, kindly refer to the authorized Summary of Product Characteristics through the following link <http://www.medicinesauthority.gov.mt/products/search.htm>.

Furthermore, you are being invited to visit the website in order to access the approved Summary of Product Characteristics for products that have been granted a Marketing Authorisation <http://www.medicinesauthority.gov.mt/marketingauth.htm>
