Dear Patient or Caregiver,

Your doctor has prescribed Daxas® for you as a treatment for your chronic obstructive pulmonary disease (COPD). Please tell your doctor if you have a history of any of the following conditions:

- cancer, heart failure, use of immunosuppressive medicinal products
- sleeplessness, anxiety, panic attack, depression, suicidal thoughts or behaviour
- multiple sclerosis (MS) or SLE (Systemic Lupus Erythematosus)
- infection with tuberculosis (TB), herpes, herpes zoster (Shingles), hepatitis, HIV
- progressive multifocal leukoencephalopathy, liver problems (e.g. hepatic impairment)

You should also inform your doctor if during treatment you develop symptoms related to:

- sleeplessness, anxiety, nervousness, panic attack (please describe all symptoms during the attack), depression, changes in mood or behaviour, suicidal thoughts or behaviour.
- severe infection.

Please tell your doctor if you are taking any other medicines he/she doesn't know about.

In some patients, Daxas® may cause a decrease in body weight (not related to a diet or exercise programme) and it is recommended that you weigh yourself regularly and record your weight on the back of this patient information card.

To help your doctor manage your weight you should bring this card with you at each visit.
