Reporting of side effects

Reporting suspected adverse events or reactions after authorisation of the medicinal product is important. It allows continued monitoring of the benefit/risk balance of the medicinal product. Healthcare professionals are asked to report any suspected adverse reactions (see details below).

Where possible, adverse events or reactions should be reported by brand name and batch number. In the event of a suspected adverse event, please report it to:

Mint Health Ltd., 3/4 Cantrija
Complex, Triq it-Targa Il Maghtab,
Naxxar Malta
+356 2093 9800

pharmacovigilancem@mint.com.mt

Alternatively, suspected adverse reactions should be reported to:
Pharmacovigilance Section at
Post-Licensing Directorate, Medicines
Authority,
Sir Temi Zammit Buildings,
Malta Life Sciences Park,
San Gwann SGN 3000
E: postlicensing.medicinesauthority@gov.mt
W: www.medicinesauthority.gov.mt/adrportal

Information on risk prevention
agreed with the Malta Medicines
Authority,
January 2024

Available on the Malta Medicines
Authority website:
www.medicinesauthority.gov.mt/rmm

Why have I been given this card?

This card contains important safety information that you should consider before starting treatment with voriconazole and for the period of the treatment:

It also includes your name and the doctor's name and phone number.

What should I do with this card?

- Always carry this card with you, for example, in your wallet or purse.
- Show this card to any doctor or health care professional who treats you.
- If you do not understand this information, ask your doctor for an explanation.

What precautions should I take while taking voriconazole?

During treatment with voriconazole, you should avoid intense and prolonged exposure to direct sunlight. It is important to cover areas of skin exposed to the sun and to use plenty of sunscreen with a high sun protection factor (SPF), as your skin may have an increased sensitivity to the sun's ultraviolet rays.

In patients treated with this drug there is a small chance that skin cancer will develop over time.

What should I do if I have a skin reaction?

You should contact your doctor if you have:
sunburn or an intense skin reaction after exposure to light or sunshine.

Do not forget to go to all your check-ups. Your doctor may feel it necessary to do blood tests and skin evaluations at these check-ups. Have a list of all the medicines you are taking and the medical conditions you have ready at each visit to a health care professional.

Where can I get more information?

See the leaflet for more information.

Make sure you have a list of all your medicines when you talk to a healthcare professional.

Ask your doctor or nurse if you have any questions about the information on this card.
